Undergraduate student outcomes for the Mount’s Class of 2016 includes those students who received bachelor’s degrees between September 2015-June 30, 2016. The Career Center and the Office of Institutional Research collected the data included in this report from January-September 2017.

Of the 345 traditional bachelor’s degree recipients, post-graduation career activities were obtained for 90 percent of the graduates. These data was acquired directly from graduates, faculty and staff members, parents and social media. The National Association of Colleges and Employers (NACE) recommends a 65 percent knowledge rate.
